Www: www.muovihaka.com

Product: Jaguar
Type: Interlocking modular entrance mat

Jaguar entrance mat has been tested according EN requirements and conform to the following standards and norms:

Slip resistance: - Conforms to DIN 51130 classification R 10
- Average total acceptance angle 17,3°

Fire classification: - Cfl-s1: EN ISO 11925-2, EN ISO 9239-1, EN 13501-1

Emissions: - ISO 16000-9: TVOC 41 µg/(m²h). Class A+

The product is manufactured in terms of established and maintained system of quality management and conform all the technical data, described in the technical data sheet.

Muovihaka Oy declares that Jaguar entrance mat has been manufactured from the virgin compound of hardwearing polymers and the products conform to international requirements ensuring safety of life, health of consumers, protection of environment and prevention of harm to property of consumers.

Interlocking modular entrance mats are not regarded as construction product according Construction Products Directive 89/106/EEC-CPD, because they are not used in a permanent manner in building construction works. Modular mats don't have harmonized European product standard (hEN) and for this reason CE marking is not required.
